Tools NOT Toys!

COURIER™

for Reliant

Remote PC Retrieval & Playback Software

COURIER™ for Reliant is an integrated solution supporting multiple simultaneous users, accessing one or more DI Reliant's from remote locations.

COURIER™ for Reliant provides password authorized users with the ability to quickly retrieve, review, duplicate, and distribute recorded calls over an existing network.

COURIER™ for Reliant incorporates the look, feel and functionality of our elegantly simple "point and click" operator graphical user interface enabling even novice operators to experience the benefits of remote access within minutes.
